PROFESSIONAL EXPERIENCE

Senior Manager, GenAI Product Management

Oct 2024 – Present

Wayfair

- **Led Wayfair's enterprise GenAI platform** — a cross-cutting AI capability layer spanning engineering velocity, supplier catalog intelligence, and consumer search — deployed across **2,800+ engineers** and 15,000+ employees in 8 countries, delivering **\$300M business impact** and \$15M engineering cost reduction (developer velocity +15%, release speed +25%, service availability 98%).
- **Shipped the engineering velocity module** — agentic coding assistants, RAG-powered PR evaluation, and the **Model Proxy** governance layer unifying multi-LLM backends (Copilot/Cursor) with eval frameworks (confidence thresholds, safety guardrails, drift monitoring, HITL fallbacks) — cutting PR review time 40% and eliminating 50+ hours/week/team.
- **Currently shipping Catalog Autofill** — a **GenAI** product auto-generating supplier catalog attributes from unstructured data, extending the **platform** to the supplier surface; roadmap: Customer Search (Rufus-equivalent for Wayfair's 40M+ SKU catalog), bringing the AI capability layer directly to the consumer.
- **Secured \$2M AI/ML investment and multi-year** partnerships with Google, Microsoft, and Cursor via C-suite strategy rhythm; Advisory Committee (8 VPs), Champions Group (20+), 500-adopter beta triaging 200+ feedback items — lifting satisfaction +400 bps, beating Q1/Q2 MAU targets by 140% and 250%; mentor 2 PMs.
